Regional Planning and Case Study of Goa Region

PROF:DARSHAN V..PATEL

Background

- The District Planning in the form of decentralised planning for a balanced, integrated and meaningful development of districts has been an accepted concept since the beginning of the planning era.
- Difficulties in integration:
  - a wide gap between the concept and the practices
  - states differ widely in their levels of decentralisation of development administration

PROF:DARSHAN V.PATEL

Background

- Comprehensive guidelines for district planning by Planning Commission in 1969
- Difficulties in implementation:
  - institutional mechanism for district planning not fully geared.
  - low level of awareness.

Background

- Planning Commission in 1982 set up a Working Group under the Chairmanship of Dr. C.H. Hanumantharao, recommended:
  - Spatial Planning,
  - rural urban integration
  - peoples` participation
  - institutional framework

  as integral part of district planning

  (Above could not be implemented as the institutional framework not changed)

PROF:DARSHAN V..PATEL

Concept of Integration in District Planning

- Necessary
  - To avoid multiplicity of institutions and processes and overlapping functions
  - to achieve functional and spatial integration at planning and implementation stage

Concept of Integration in District Planning

- types of integration
  - integration in planning
  - coordination in implementations
- more emphasis on coordination in implementations to achieve integrated development since the district planning bodies had limited planning functions.

PROF:DARSHAN V..PATEL

Concept of Integration in District Planning

- The Working Group recommended integration at plan formulation level
- *planning activity should be undertaken by one single agency*
- The concept of District Planning Committee as provided by the 74th CAA is a step forward to achieve this goal.

Provisions of 74th Constitution Amendment Act

- The 73rd Constitutional Amendment Act (73rd CAA) came in effect from 24th April, 1993 and 74th Constitution Amendment Act (74th CAA), in effect from 1st June 1993, ushered a new era in the history of urban local government in the country.
- The Constitution of India has detailed provisions for ensuring protection of democracy in Parliament and State Legislatures; however, it did not make local self-government in urban areas a clear cut constitutional obligation.
- Even though there was provision for organization of village Panchayats in the Directive Principles of State Policy, there was no reference to municipalities except implicitly in Entry – 5 of the State List.
- The 74th CAA (referred to as part IXA of Constitution) made provisions for decentralization, thereby, ensuring democracy in the establishment and operation of local self-government.
- It bestows power to the people to plan for themselves and participate in the decision making process

1) Constitution of Panchayats and Municipalities:
Article 243 B of 73rd CAA, provides for the constitution of *Panchayats* at three levels in a state:
a) Village,
b) Intermediate (may not be constituted in a State having a population not exceeding twenty lakhs) and
c) District.
Article 243 Q of 74th CAA, provides for constitution of Municipalities in every State as given under:
a) Nagar Panchayat for transitional area, that is to say, an area in transition from rural to urban in character.
b) Municipal Council for a smaller urban area

2) **Constitution of Ward Committees:** Article 243 S provides for constitution of ward committees, consisting of one or more wards, within the territorial area of a Municipality having a population of 3, 00,000 or more.

3) **Duration of Municipalities:** Article 243 E of 73rd CAA and 243 U of 74th CAA, provides a fixed term of 5 years of a *panchayat* and municipality respectively, from the date appointed. Elections to constitute a *panchayat* or municipality are required to be completed before the expiration of the duration of the municipality.

4) **Powers, authority and responsibilities of *Panchayats* and Municipalities**:

Article 243G of 73rd and 243W of 74th CAA provides powers, authority and responsibilities of Municipalities subject that legislature of the State by law endow:

a) The Panchayats and Municipality with such powers and authority those are necessary to enable them to function as institutions of self-government.
The law prepared by the state government may contain provisions for the devolution of powers and responsibilities upon Municipalities, with or without conditions with respect to the preparation of plans for economic development and social justice;

Table 1.1: Items listed in Eleventh and Twelfth Schedule

S.No.	29 Items of the 11th Schedule	S.No.	18 Items of the 12th Schedule
1	Agriculture, including agricultural extension	1	Urban planning including town planning
2	Land improvement, implementation of land reforms, land consolidation and soil conservation	2	Regulation of land-use and construction of buildings
3	Minor irrigation, water management and watershed development	3	Planning for economic and social development
4	Animal husbandry, dairying and poultry	4	Roads and bridges
5	Fisheries.	5	Water supply for domestic, industrial and commercial purposes
6	Social forestry and farm forestry	6	Public health, sanitation conservancy and solid waste management
7	Minor forest produce	7	Fire services
8	Small scale industries, including food processing industries	8	Urban forestry, protection of the environment and promotion of ecological aspects
9	*Khadi*, village and cottage industries	9	Safeguarding the interests of weaker sections of society, including the handicapped and mentally retarded
10	Rural housing	10	Slum improvement and up-gradation
11	Drinking water	11	Urban poverty alleviation
12	Fuel and fodder	12	Provision of urban amenities and facilities such as parks, gardens, playgrounds
13	Roads, culverts, bridges, ferries, waterways and other means of	13	Promotion of cultural, educational and aesthetic aspects

S.No.	29 Items of the 11th Schedule	S.No.	18 Items of the 12th Schedule
	communication		
14	Rural electrification, including distribution of electricity	14	Burials and burial grounds; cremations, cremation grounds and electric crematoriums
15	Non-conventional energy sources	15	Cattle pounds; prevention of cruelty to animals
16	Poverty alleviation programme	16	Vital statistics including registration of births and deaths
17	Education, including primary and secondary schools	17	Public amenities including street lighting, parking lots, bus stops and public conveniences
18	Technical training and vocational education	18	Regulation of slaughter houses and tanneries
19	Adult and non-formal education		
20	Libraries.		
21	Cultural activities		
22	Markets and fairs		
23	Health and sanitation, including hospitals, primary health centres and dispensaries		
24	Family welfare		
25	Women and child development		
26	Social welfare, including welfare of the handicapped and mentally retarded		
27	Welfare of the weaker sections, and in particular, of the Scheduled Castes and the Scheduled Tribes		
28	Public distribution system		
29	Maintenance of community assets		

Source: 73rd & 74th Constitutional Amendment Act

5) Finances of *Panchayats* and Municipalities: As per Article 243 H of 73rd & 243 X of 74th CAA it has been left to the legislature of the State to specify the imposition of taxes.

Table 1.2: Finances of *Panchayats* & Municipalities

Revenue Sources	Responsibility of
Taxes, Duties, fees etcetera	Levied and collected by *Panchayats* &Municipalities
Taxes, Duties, fees etcetera	Levied and collected by State Government
Grant-in-aid	Given to municipalities from the State Government
Funds	For crediting and withdrawal of money by *Panchayats* & Municipality

Source: 73rd & 74th Constitutional Amendment Act

6) **State Finance Commission:**

Article 243 I of 73rd CAA give provision of State Finance Commission (SFC). Article 243 Y of 74th CAA extends duty/power of SFC to review the financial positions of municipalities apart from *Panchayati Raj* Institutions and make recommendations to the Governor.

7) **Committee for District Planning:**

Article 243 ZD provides for constitution of District Planning Committee at district level in every state, to consolidate the plans prepared by the Panchayats and the Municipalities in the district and to prepare a draft development plan for the district as a whole.

a) A close study of this article provides a reasonable inference that each municipality is expected to prepare a plan for its area and undertake the task of urban planning including town planning, regulation of land uses, construction of buildings and phasing of the programme for economic and social development as envisaged in the Twelfth Schedule.

b) The DPC would provide interaction with the municipal bodies and panchayati Raj institutions, in addition to planning and conflict resolutions.

8) **Committee for Metropolitan Planning:**

Article 243 ZE provides for constitution of a Metropolitan Planning Committee (MPC) for planning a metropolitan area having a population of 10 lakh or more, comprising one or more districts and consisting of one or more municipalities or panchayats.

9) Scheduled Areas:

In terms of Article 243 M of 73rd&243ZC of 74th CAA, these provisions shall not apply to Scheduled areas and Tribal areas as referred to in Article 244 of the Constitution (i.e Scheduled areas and scheduled tribes in the States of Assam, Meghalaya, Tripura and Mizoram.) However, Parliament may by law, extend the provisions of Part IXA to these areas subject to such exceptions
and modifications as may be specified in that law.

Rural-Urban Integration

- Came into being along with 'Integrated Rural Development Programme
- It recommended for provision of higher order services and amenities related to agriculture and other allied activities in small and medium towns.

The need to integrate the rural activities particularly with the small and medium towns had become a crucial issue in order to find suitable locations and assign the functions of focal points to these towns for provision of higher order services and amenities related to agricultural and other allied activities.

PROF:DARSHAN V.PATEL

Rural-Urban Integration

- Approach further reinforced by the report of Task Force on 'Planning & Development of Small & Medium Towns & Cities' set up in 1975
- It recognised 'spatial plan at regional / district level as an important tool of rural urban integration through provisions of various levels of services and facilities.'

PROF:DARSHAN V..PATEL

Rural-Urban Integration

It says, "***The (Urban) Plans generally bear no relationship with the rural hinterland of the district…No plan can be realistic unless it takes into account the interaction between the two… It calls for total district planning integrating a settlement pattern to promote human activity, balanced development and a congenial environment.***" It also recommended, "***District and local physical plans should be prepared within the framework of the regional plans and a suitable statutory authority should be entrusted at the district or area level to draw up detailed plans and programmes on the basis of a settlement plan, integrating rural and urban areas.***"

PROF:DARSHAN V..PATEL

Table– 1.3: Planning System Framework

Planning system	Scope and purpose of the plan	Time frame*	Various plans; indicative list							
Core area of planning										
Perspective Plan	To develop vision and provide a policy framework for urban & regional development and further detailing	20-30 years	Long Term Perspective Vision document	Concept plan	Mission statement	--	--	--	--	--
Regional Plan	To identify the region and regional resources for development within which settlement (urban and rural) plan to be prepared and regulated by DPC.	20years	Regional Plan (Mobility 1)	Sub-regional plan	--	--	--	--	--	--
Development Plan	To prepare a comprehensive Development Plan for urban areas, Peri-urban areas under control of Development authority/ Metropolitan Planning Committee.	20-30 years (Review every 5 years)	District Development Plan (Mobility 1)	City/ Metropolitan Development Plan (Mobility 2)	Master Plan City Utility (30 years)	Revised Development Plan	--	--	--	--
Local Area Plan	To detail the sub-city landuse plan and integration with urban infrastructure, mobility and services.	5-20 year (Review every 5 yrs)	Town Planning Schemes	Zonal Plan / Sub-city plan	Ward Committee Plan	Coastal Zone Mgmt Plan	Urban Redevelopment Plan	--	--	--
Specific and investment planning					1.4.1.		1.4.2.		1.4.3.	
Special Purpose Plan	To identify the needs of the special areas which require special plan within the framework of the development plan.	5-20 year (within city utilities 30 year plan)	City Development Plan (as per JnNURM)	Comprehensive Mobility Plan (as per JnNURM)	City Sanitation Plan (as per JnNURM)	Disaster Management Plan (as per NDMA)	Slum Redevelopment Plan (as per RAY)	Tourism Master Plan	Environmental Conservation Plan	Heritage Conservation Plan
Annual plan	To translate Development Plan in the context of annual physical & fiscal resource requirement. To monitor plan implementation with performance milestones.	1 year	Investment plan	Audit and monitoring plan	--	--	--	--	--	--
Project/ Research	To focus on project related investments, costing and returns & for the studies required prior to or post plan formulation. This should be a continuous process to support planning and implementation at all stages and promotes innovation in practice.	5-20 year	Pre-feasibility & feasibility study	Detailed Project Report	Schemes & Sub-projects	Surveys & Studies	Project such as: Riverfront development projects	--	--	--

Note: Consultative meetings and the regional workshops during URDFI formulation have pointed out the need to review the plan period of 20 years and extend the same to 30 years. However general consensus was in the favour of 20 years. Intermittent review in 5 year gap would be required.

2.1.7. Decentralisation of Plan Approval Process

Following the spirit of the 74th CAA and also recognising the fact that the current process of approval of urban development plans is time consuming resulting into delays, it is recommended that the plan approval process be decentralised as follows:

Table 2.2: Decentralised Plan Approval Process

Plan	Approving authority
Perspective plan	State Government
Regional Plan	State Government / Regional Development Authority
Development Plan	Municipal Corporation/ Development Authority/ MPC
Annual Plan	Municipal Council/ Municipal Corporation/ Development Authority
Zonal Development Plan	Municipal Corporation/ Development Authority/ MPC
Urban Revitalisation Plan	Municipal Corporation/ Development Authority/ MPC
City Development Plan (terminology to be changed to City Investment Plan)	As above
Comprehensive Mobility Plan	As above
City Sanitation Plan	As above
Projects/ Research	Municipal Corporation/ Development Authority/ MPC

Once the authority approves the Draft Plan, it can be put in public domain as per the State Town & Country Planning Act for inviting objections and suggestions from the public and various stakeholders.

REGIONAL PLAN

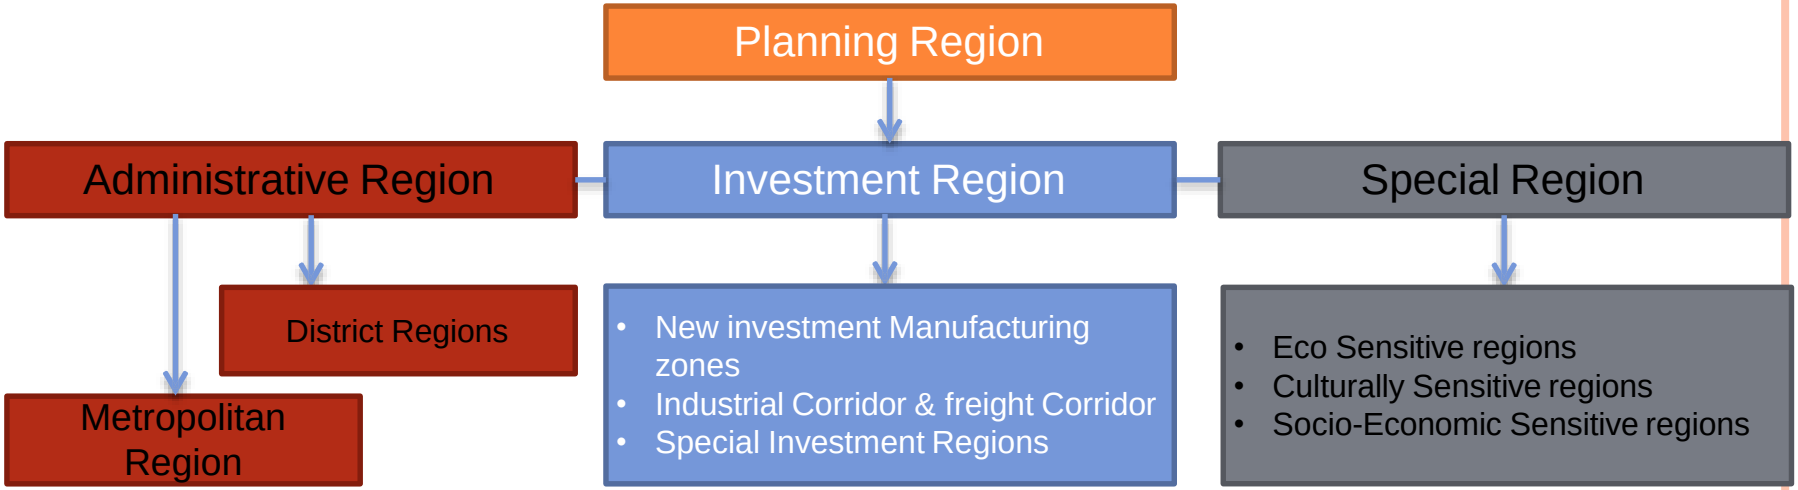

Region is a contiguous geographical area, which has a fair degree of uniformity, in administration, economic linkages or natural environment. It is relatively a large area, with hierarchy of settlements and varying landscape. ***(Source-URDPFI Guidelines) 2015***

Example- Southern Regions (Tamil Nadu, Andhra Pradesh, Karnataka, Kerala) ,European Economic Market, SAARC, Damodar Valley, Mumbai Metropolitan Region etc.

Region Introduction	Analysis of regional resources	Projected requirements	Implementation Plan	Major proposals and projects
About the Region Constituted areas: Region, Sub-region, Functional areas, Growth centres etc. Ratio of Urban and rural development Region Morphology	• Physical setting • Geography of the Region • Demography (Region and Sub-region wise) • Settlement pattern • Transportation • Physical and Socio Economic linkages • Environment	According To the project needs and suitability	• Implementation strategies for the region for land and resource mobilisation • Co-ordination of local bodies and authorities and integrated management • structure for the region • Estimation of the Fiscal requirement phase-wise and source of fund. Specifying • projects to be taken up under PPP • Priorities of the developmental projects and further detailing of plans • Framework of monitoring and its mechanism	• Regional policy & Development strategy • Regional land use and Development Controls • Regional infrastructure • Disaster Risk Mitigation measures • Tourism • New and Modified Policies

(Source-URDPFI Guidelines) 2015

Considering the importance of regional planning at the district level and with the view to integrating the urban and regional development, the DPC and MPC were created through the 73rd and 74th CAA.

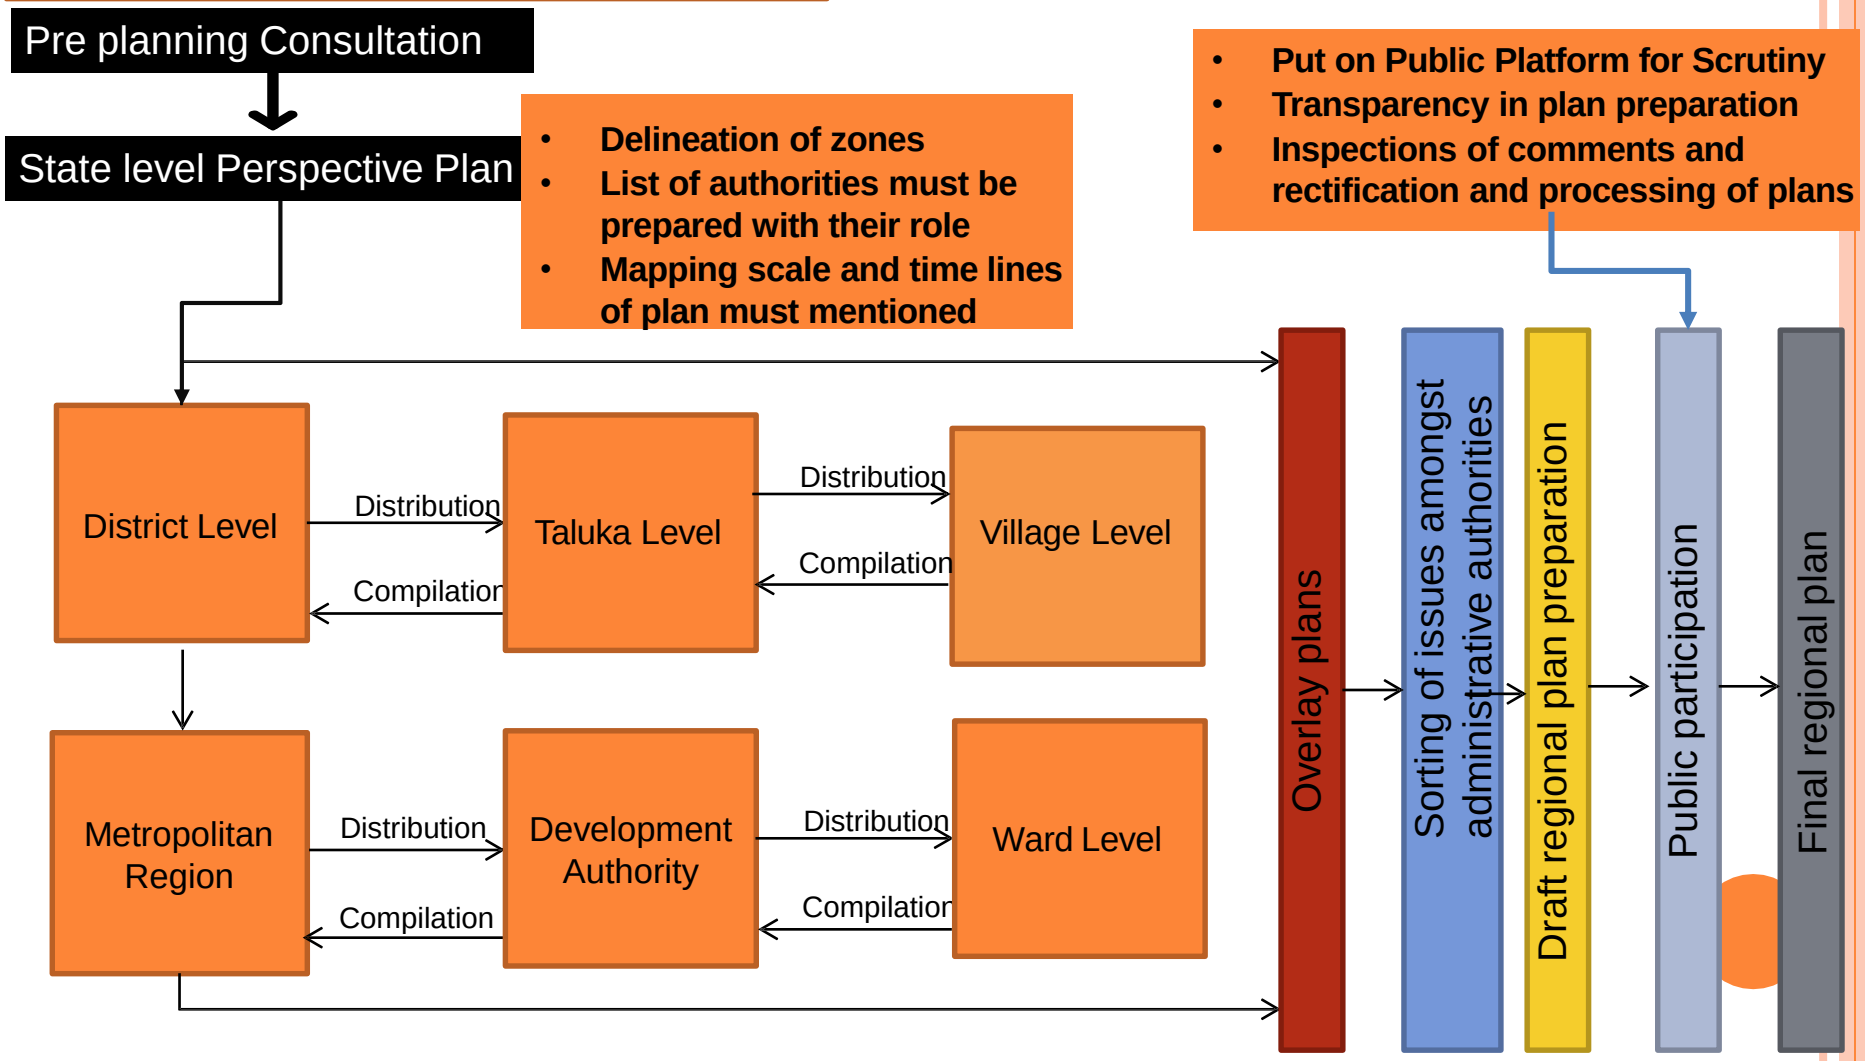

Delineation	As per provisions of Constitutional Amendment Acr	Region based on Homogeneity, Functional Relationship, Administrative Regions	
Legal Provision for a regions		Specific Provisions formulated	Legal provision for delineating special regions
Planning Effects	Some states have provision to prepare DP on lines of CAA	Efforts have been taken by some state for investment regions and at national level	Very few special regions in India
Administrative Setup	Administrative setup of these regions have to decide by State Legislature	Based on the requirements of the region , administrative setup be decide by State or Centre.	

Source- Compilation From 73rd & 74th CCA, 1992, Administrative setups & Regional Planning Cases in India

District as Planning Region

- India has 640 districts and according to Census of India,2011.
- 67 % districts are urbanized up to 50 % out of which approximately 7 % have crossed the line of 40 % Urbanization and 9 % districts are 100 % urbanized.

Proposed District Planning process

Aspects of Investment Region Planning

- The policy in relation to land-use and the allocation of land for different uses.
- Identification of the potential nodes and counter magnets (if required for decongestion) for future and proposals for development.
- Integrated transport policy, administration policy, law and order machinery.
- Plan for regional infrastructure linkages, a dedicated and sustainable connectivity across the corridor and hinterland.
- Policy for economic development.
- Fund flow for development.
- Indication of the areas which require immediate development as "priority areas".
- Roles and responsibilities of various stakeholders.
- Housing and shelter development.
- Protection of environmentally and ecologically sensitive areas and conservation of heritage.
- Sustainable development of resources including agriculture and rural development.
- The perspective plan should define the influence zone of the corridor or define the rationality of selection in case of a node.
- Monitoring systems and social audit mechanisms to ensure effective implementation of the plan.

Criteria for Delineation of Region

Parameters & Indicators

- **Environment and land suitability** - Soil cover & fertility, Topography, Geology, Geomorphology, Lithology & Drainage, Surface water body & Ground water table, Green & forest cover, Buffer areas, Agriculture cover and intensity of production, Hazardous zone, Other environmentally sensitive areas
- **Demographic, Quality of Life** - Population growth rate: percentage increase in population, Urbanism: percentage of urban population to total population, Migration: number of persons migrating to nodal point, Density: population per Ha, Aspect of literacy, Other socio economic aspects,
- **Flows** - Goods: Volume of goods traffic, People: Passenger traffic, Finance: banking facilities, Infrastructure links: Supply and management of services such as water supply, waste water and solid waste treatment with focus on recycling and re-use, Drainage channels, irrigation channels, power house, Information: location of institutes, movement of students and scholars , Telephone calls
- **Economic and investments** – Economic, Large investment proposals for developments, Workers Percentage of on-agricultural workers to total workers, Land ownership and land uses.
- **Others**- Contiguity of areas, Integrated development, Adjustment of boundaries with other planning areas, Manageable size of the region from planning point of view.

Sources- Various Sources including Reading Material on Planning Techniques by JH Ansari and Mahavir., URDPFI Guidelines

3.5.2. District Planning Committee

State Governments have been empowered by 74th Constitutional Amendment Act to constitute District Planning Committee. These committees are to be responsible for the preparation of District Development Plan. However, even after 2 decades of amendment, most of the states have not constituted these committees.

In a study done by TCPO in consultation with State Town & Country Planning Departments and academic institutions, tentative strength of planners required at different planning levels was deliberated. It was agreed that proportion of town planners would vary according to the population and size of the administrative units. The manpower requirement of DPCs, as assessed, is presented in **Table 3.8**.

Table 3.8: Number of Town Planners required at District Level

Designation	Number
Chief District Planning Officer	1
Senior District Planning Officer	1
Associate District Planning Officer	3
Assistant District Planning Officer	5
Total	10

Source: TCPO

GOA

- **Area:** 3702 sq.km
- **Population:** 14.58 lakhs(Prov.Census2011)

  60% live in coastal zone
- **Density:** 394 pp sq.km
- **Urban:** 62.17% of total population
- **Administrative:** 2 Districts: North Goa and South Goa with 12 Talukas 1 Mun Corporation & 13 Municipalities 189 village Panchayats

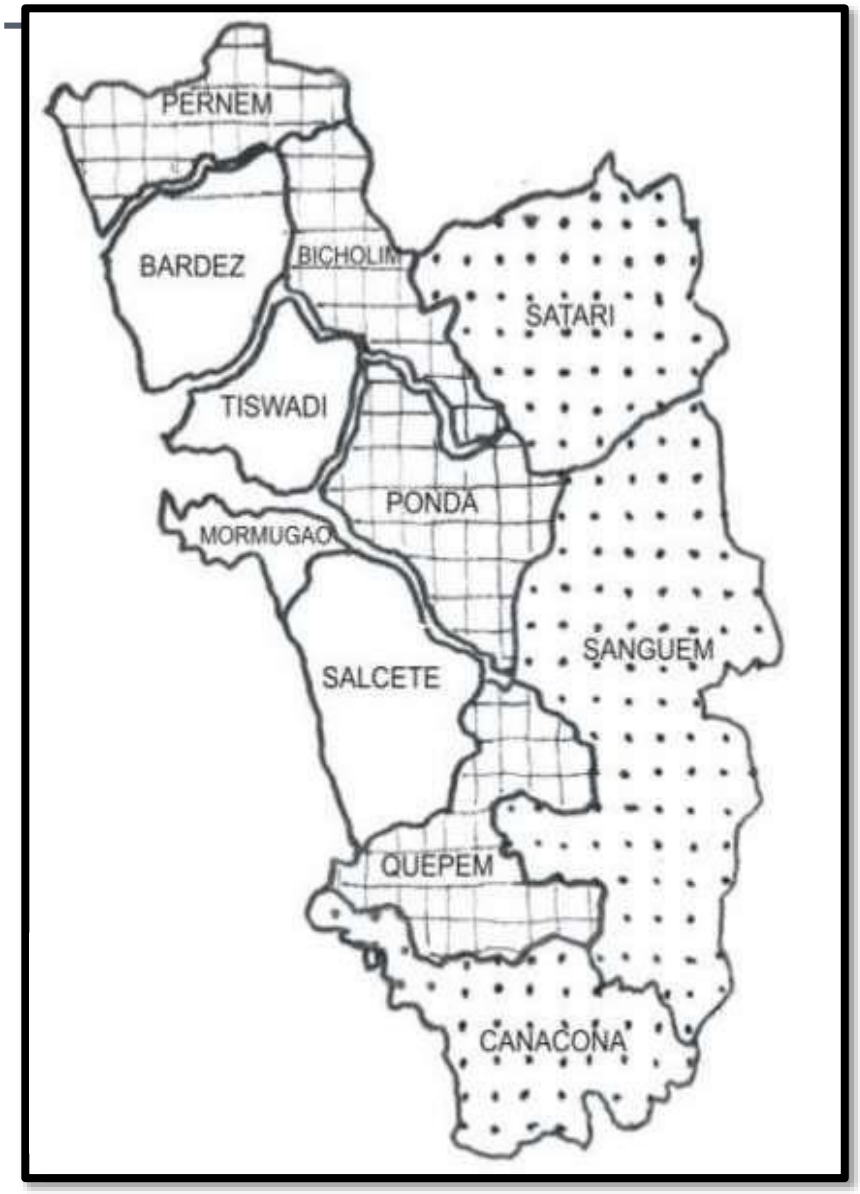

DISTRICT MAP OF GOA

TOPOGRAPHICAL DET

- 3 Topographical Zones –
  - Coastal

3 REGIONAL PLANS: GOA

- RPG 2001: First Regional Plan in India to Cover Entire State
- RPG 2011: First Regional Plan to be Scrapped
- RPG 2021: First Regional Plan to Introduce Bottom Up Planning (*Plans developed at the lowest level of firm and then channeled through each next higher level of its participation)*

BACKGROUND TO RPG-2021

- August 2006: The Final Regional Plan 2011 notified.
  - *Total 50% increase in settlement area as compared to RP 2001. Unprecedented public mobilization against Plan.*
- January 2007: Goa government denotes Regional Plan 2011 giving in to mounting public pressure.
- October 2007: CM's Task Force for RPG 2021 formed
  - *Includes Charles Correa, Edgar Ribeiro (ex-CTP India) and representative members of the public*
- September 2008: Draft RPG-2021 submitted (181 days Public Process thereafter)
- November 2010: Final RPG-2021 notified in parts

RPG-2021

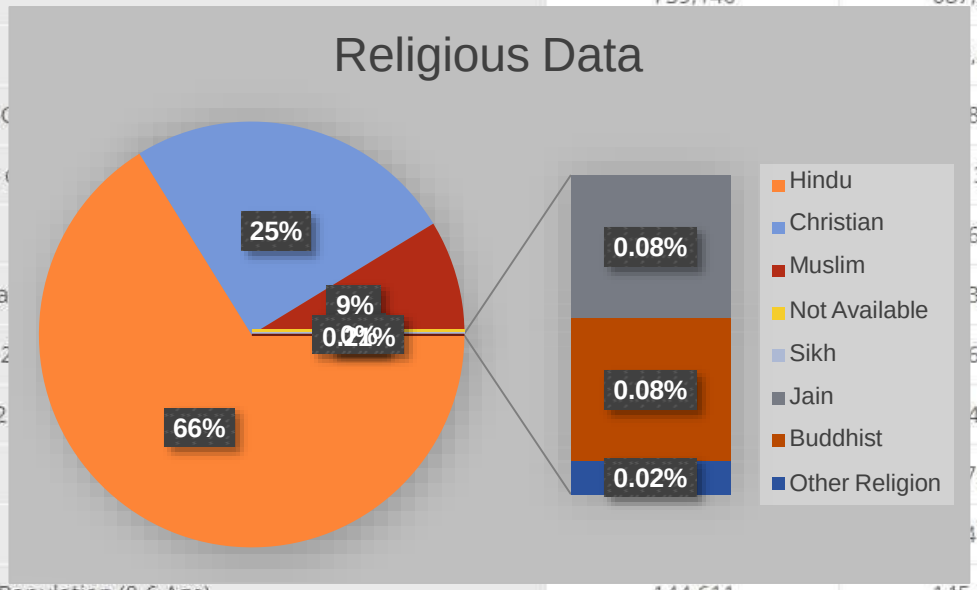

- Goa is the only state of the union to have a state level regional plan.
- The State of Goa has prepared Goa Regional Plan, 2021.
- The basic approach for preparation of Goa Regional Plan has been protection of fragile environment of the State by introducing “Eco Sensitive Zones” and planning details at village Panchayats level.
- To facilitate the regional planning three tier structure was prepared. At highest level is State Level Committee, at lowest level is village panchayat and Taluka level task force at intermediate level.
- The Regional Plan gives a micro level planning of the State of Goa with the village Panchayats as the planning units. Multiple level consultative process has been undertaken in preparation of the plan.

OBJECTIVES

"To create a more vibrant and prosperous Goa…to create a Goa that has greater economic prosperity… in a manner that does not endanger the fragile ecosystems that make Goa what it is. ..We believe this can be best done in honest and open collaboration with the people of Goa."

-Draft RPG 2021

Description	2011	2001
Approximate Population	14.59 Lakhs	13.48 Lakh
Actual Population	1,458,545	1,347,668
Male	739,140	687,248
Female		,420
Population (		89%
Percantage (		3%
Sex Ratio		61
Child Sex Ra		38
Density/km2		64
Density/mi2		43
Area(Km^2)		702
Area mi2		429
Total Child Population (0-6 Age)	144,611	145,968
Male Population (0-6 Age)	74,460	75,338
Female Population (0-6 Age)	70,151	70,630
Literacy	88.70 %	82.01 %
Male Literacy	92.65 %	88.42 %
Female Literacy	84.66 %	75.37 %

Goa at Glance, Census of India2001 2011

POWER

Goa's power demand has been increasing by leaps and bounds after its liberation. The annual per capita consumption has increased from 13 KWH to over 959 KWH, as against the national average of around 300 KWH. Electricity department can take credit for electrifying 100 percentage of the villages in Goa and focus now on making power available to all categories of users in quantity and quality. The Government of Goa has done well to permit power generation in the private sector and a 48 MW plant installed by Reliance – Salgaonkar Ltd. is already functional.

Mandovi River

Zuari River

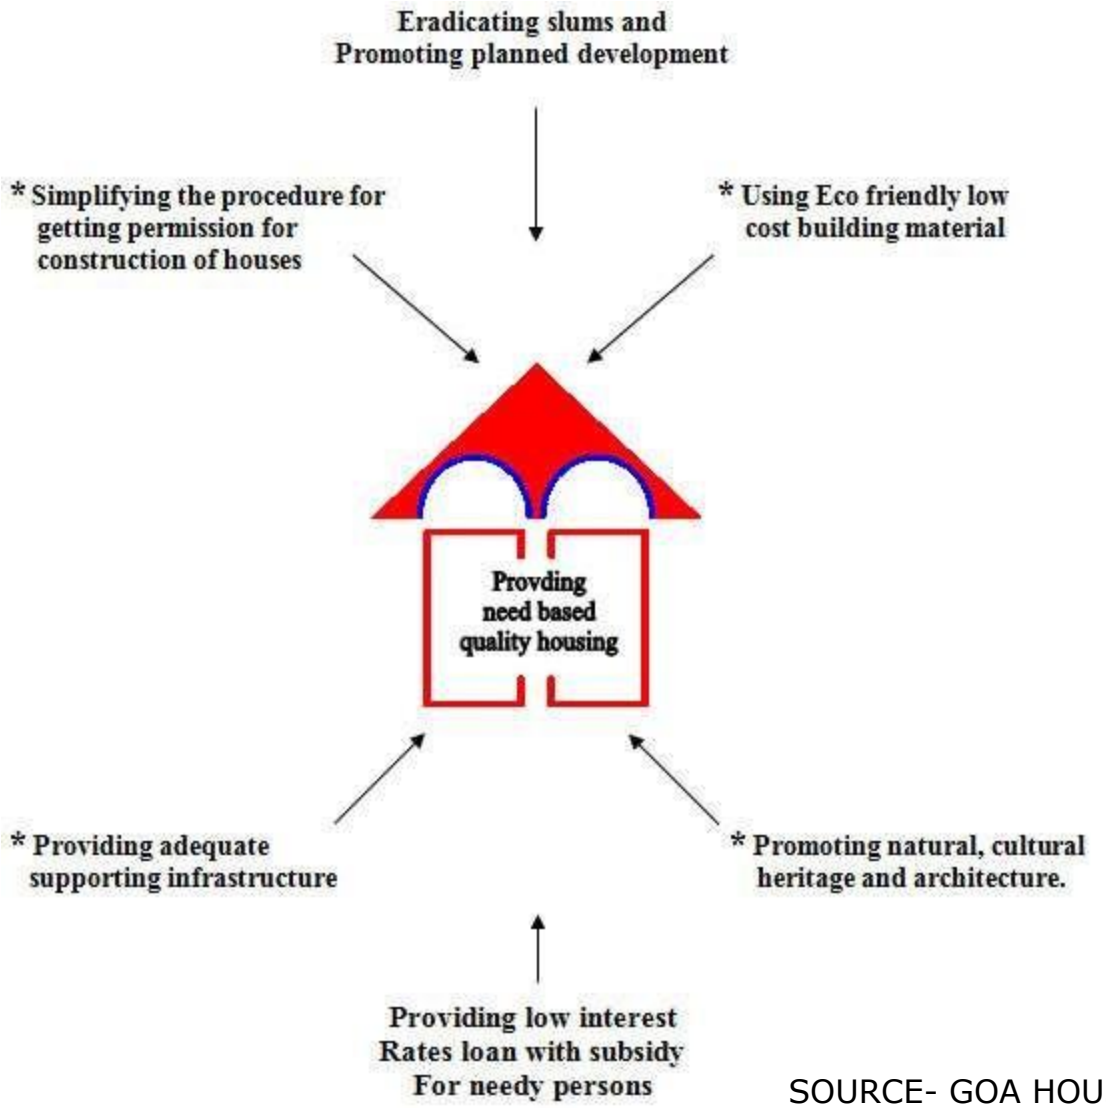

Chapora River

WATER

Goa receives an average rainfall over 3000 mm. The availability of water in Goa will not pose any problem for a number of years to come. The present water supply damnation the State is catered through Seven Regional Water Supply Schemes installed Opa, Assonora, Sanquelim, Salaulim, Canacona, Dabose and Chandel. The Salaulim water supply scheme is the largest amongst all the regional water supply schemes having capacity of 160 MLD covering most part of the South Goa District.

MISSION FOR SLUMS

It is the endeavor of the Government of Goa to provide need based, quality & affordable housing to suit local requirements along with adequate supporting infrastructure services to all by 2015 AD.

SOURCE- GOA HOUSING BOARD

ISSUES

- Pressure on land fuelled by speculation changing character of Goa's settlements
- Agriculture lands converting toreal estate
- Intra migration and lack of jobs to match skill sets of population
- Infrastructure needing upgradation.
- Environmental degradation due to Goa's two major industries- **tourism and mining.**

STRATEGIES

Toensure future balanced distribution of population and sustainable growth –

•Creation of new growth centers in the midland talukas

•Enhanced public transportation networks

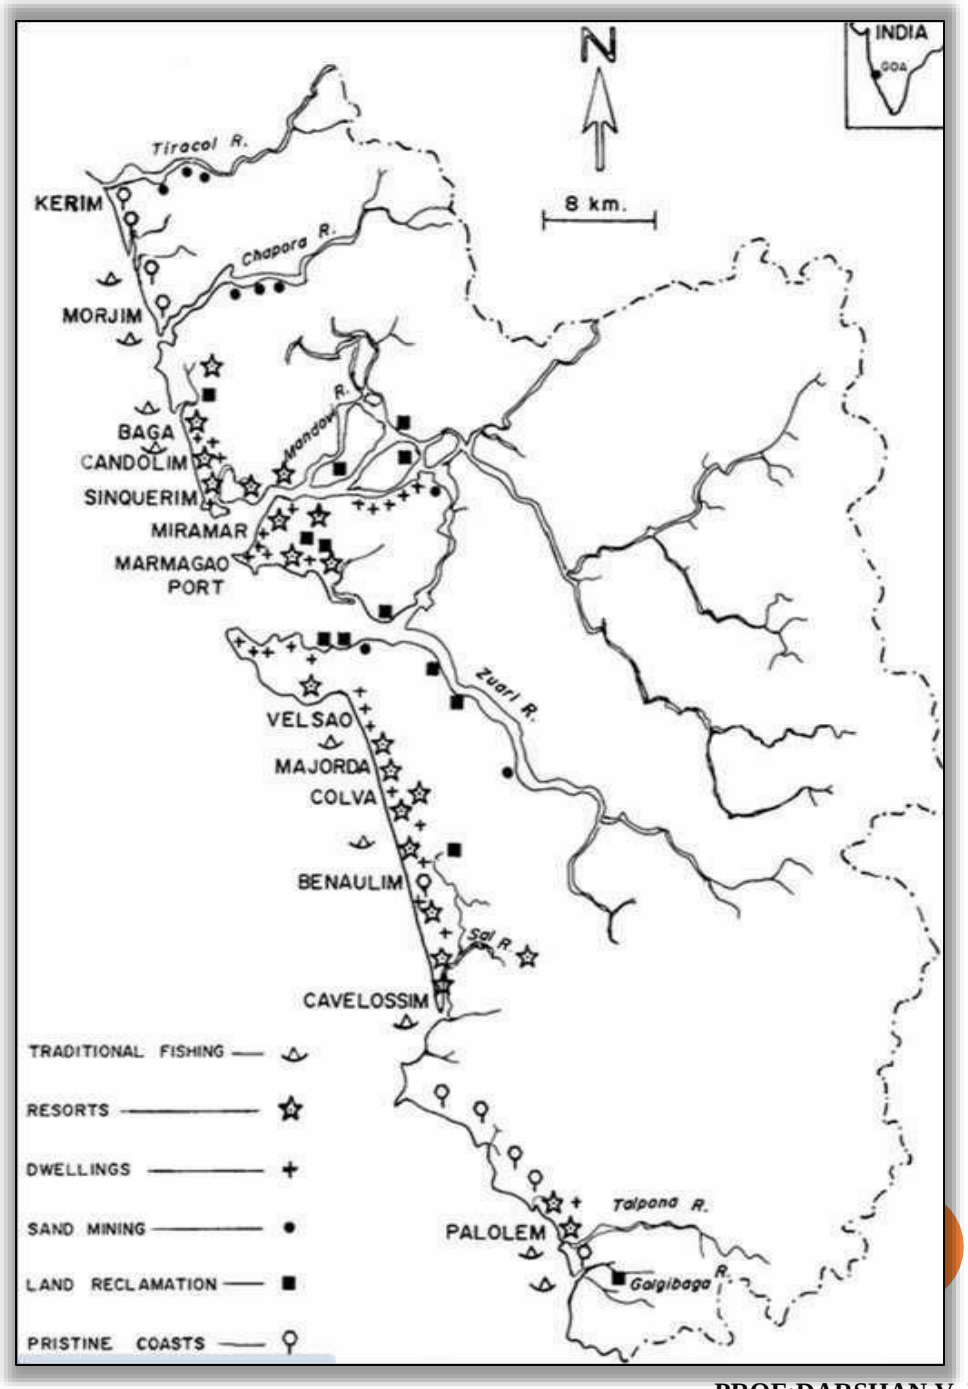

•Preserving Goa's fragile environment

TOURISM

- 26.49 lakh annual tourists
- Increasing Real Estate Development

IMPACTS

- Increasing Deforestation
- Declining Agriculture
- Increasing Water Pollution
- Decreasing Water Table
- Salt water ingress
- Increasing Solid Waste
- Inadequate Sewage Disposal

MINING AND ITS IMPACTS

- 117 operating mining leases that cover 259 sq. km of land in the state
- Large reject dumps prone to erosion during monsoon.
- Cause siltation / inundation and pollution of water bodies and agricultural lands.
- Deforestation
- Severe air pollution due to transportation of ore by open trucks

MAPPING

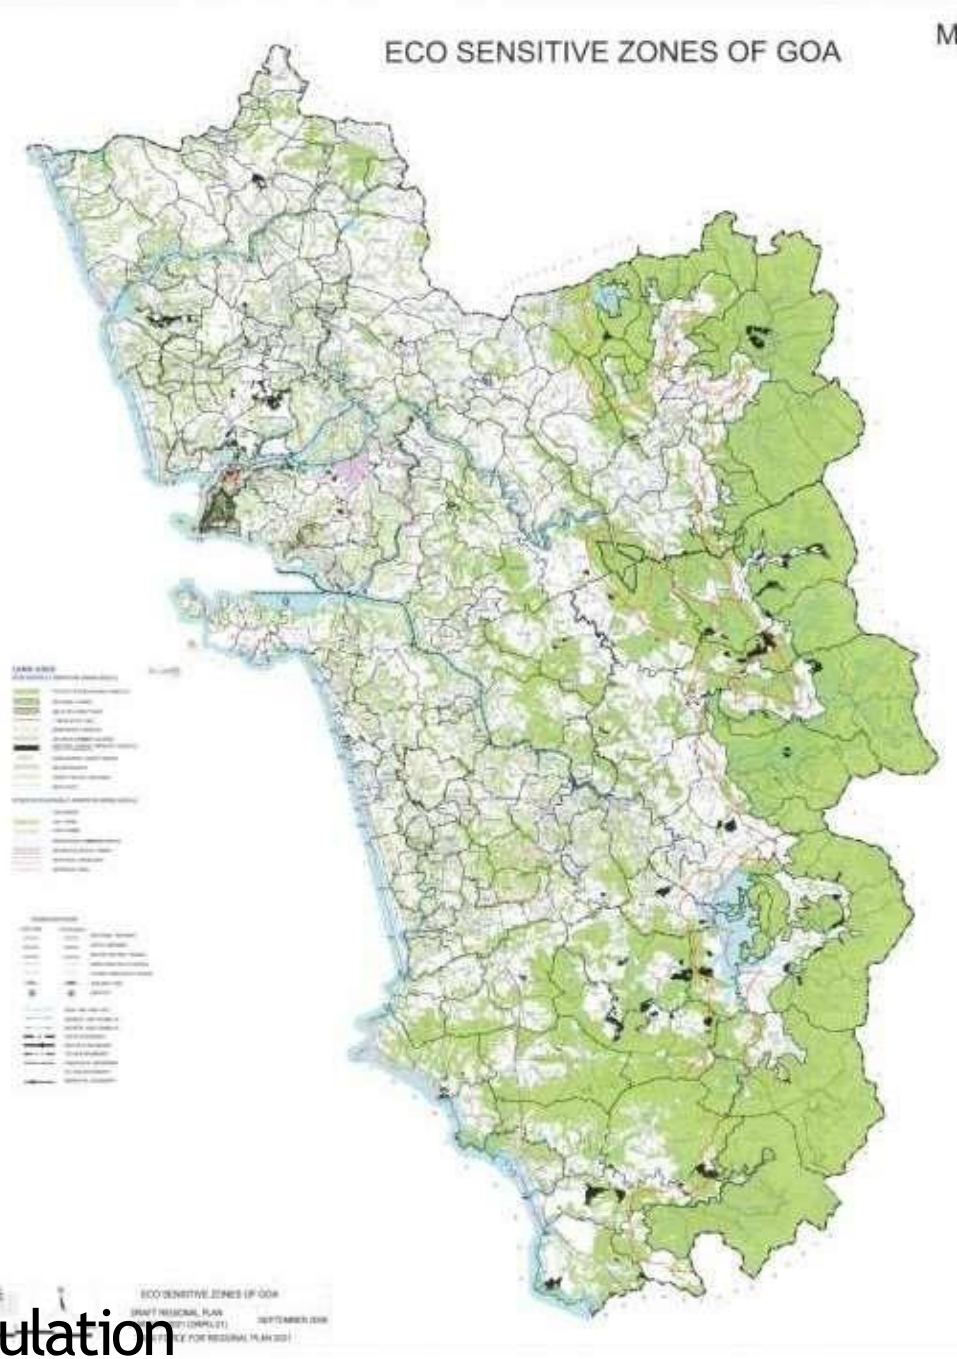

ECO-1 54.06%

- Forests (NP/Sanctuary/Protected/ Reserved/private forests) 35.53%
- Mangroves 1.22%
- Water bodies 5.32 %
- Khazan lands/paddy fields 11.66%
- Non Developable Slopes (gradient over 33%)
- CRZ-I

ECO-2 26.29%

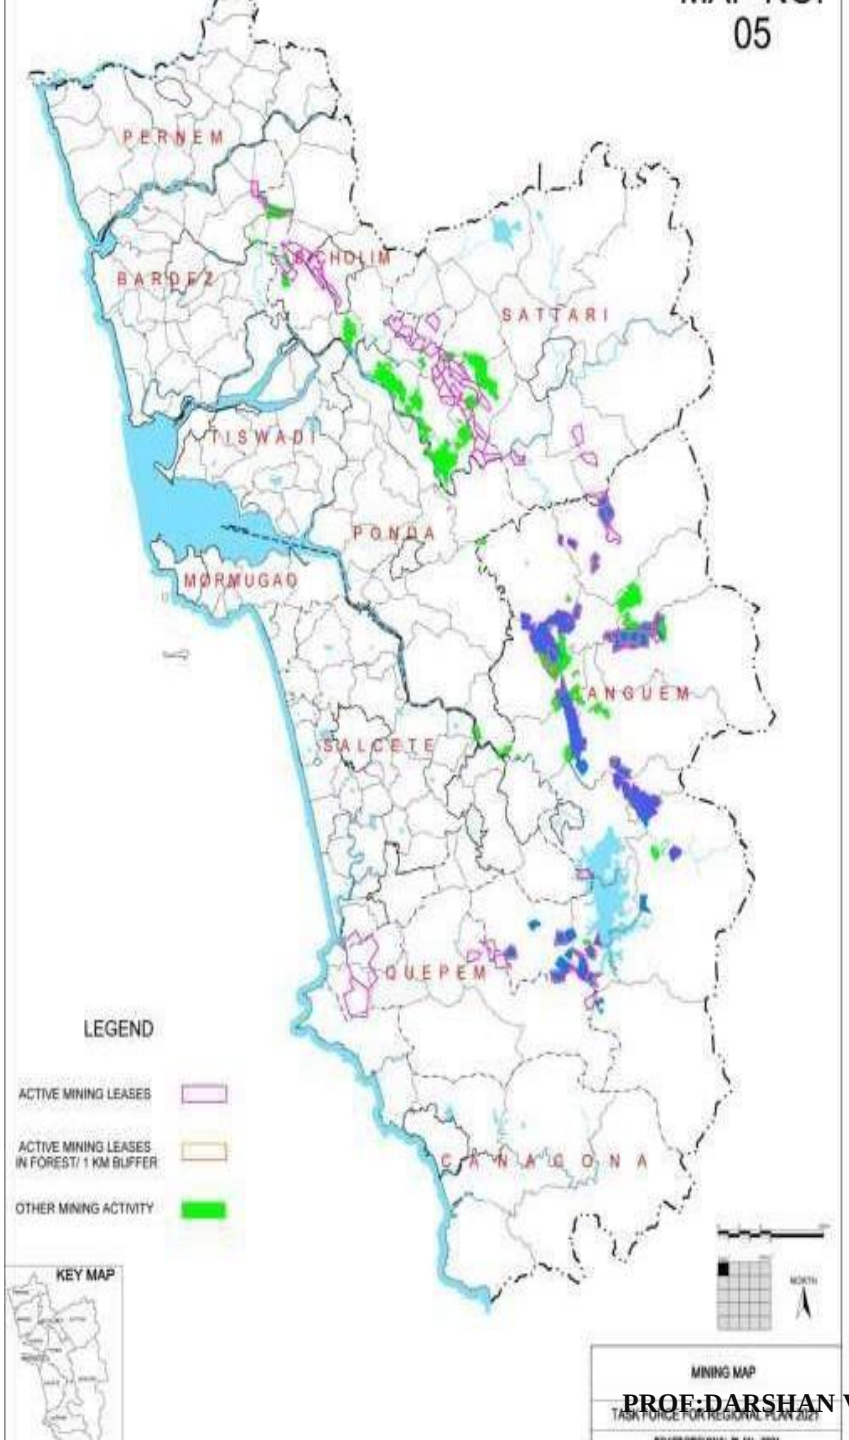

- Orchards 22.77%
- Cultivable lands 3.32 %
- Salt Pans 0.06 %
- Fish Farms/Mud Flats 0.13%, CRZ-II

80% of land under conservation/regulation

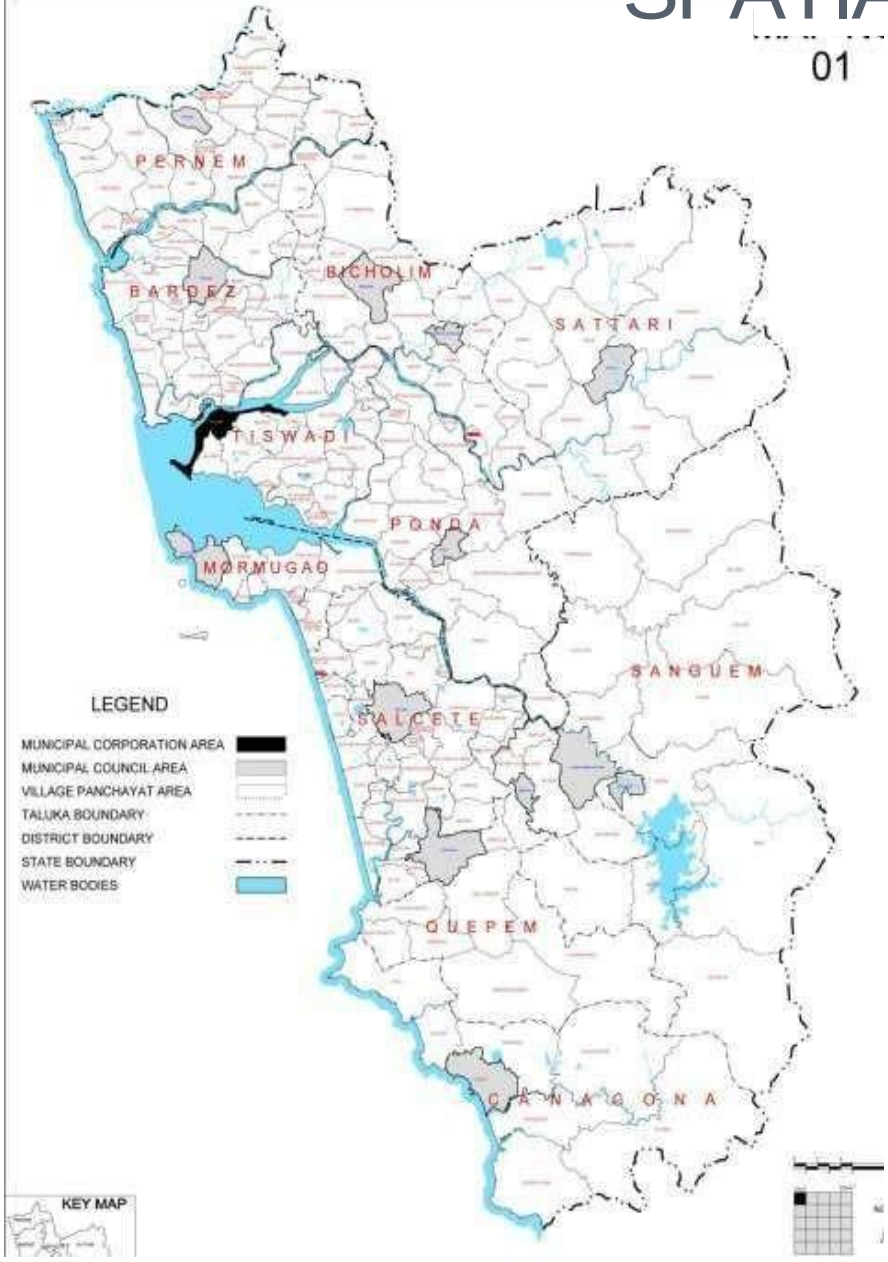

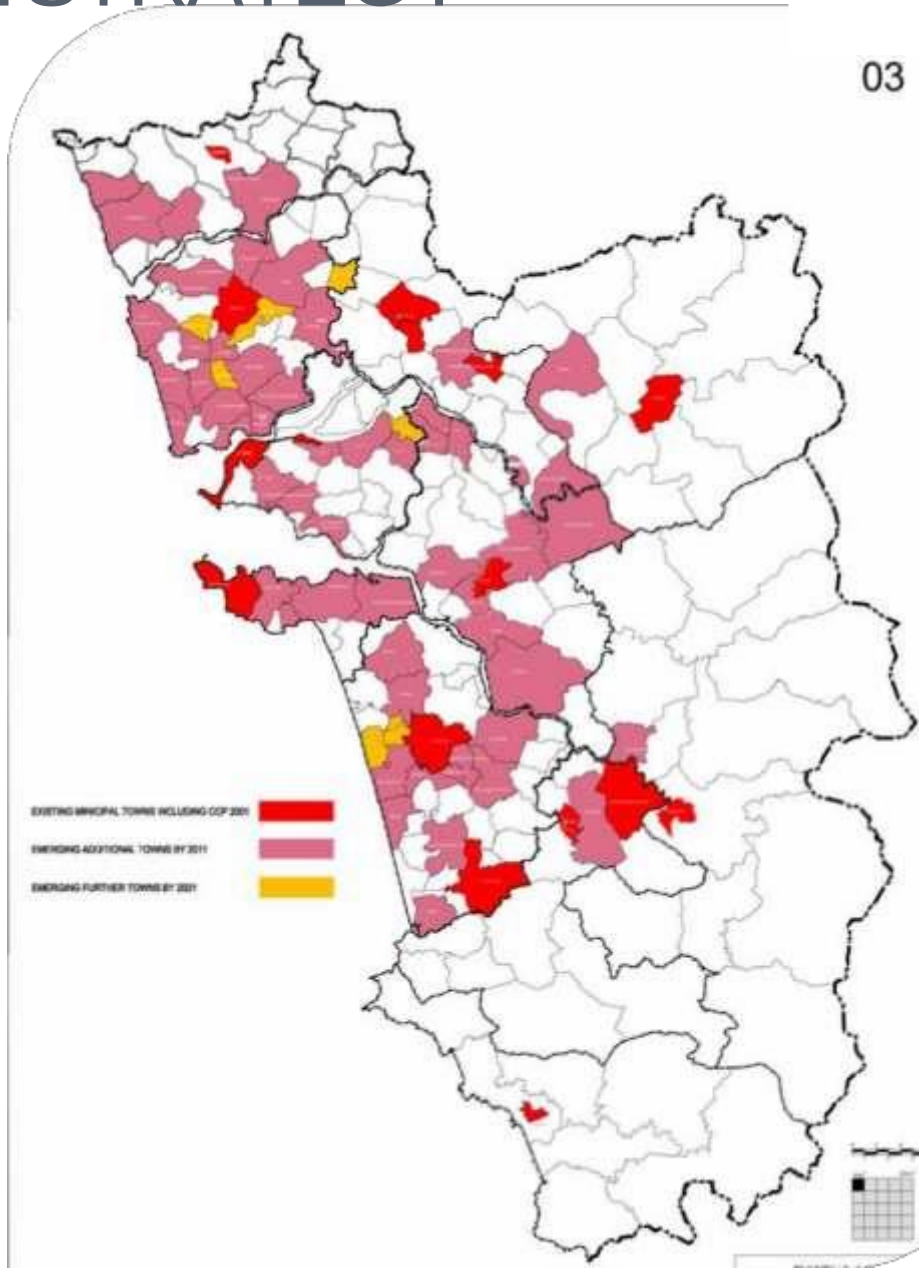

MAPPING OF MINES

- 117 active Mines
- 700 mining leases
- RP Recommendations:
  - Closure of Mines within Forests
  - Phasing out of Mines within 1 km Forest Buffer and 1 km buffer of Water Sources

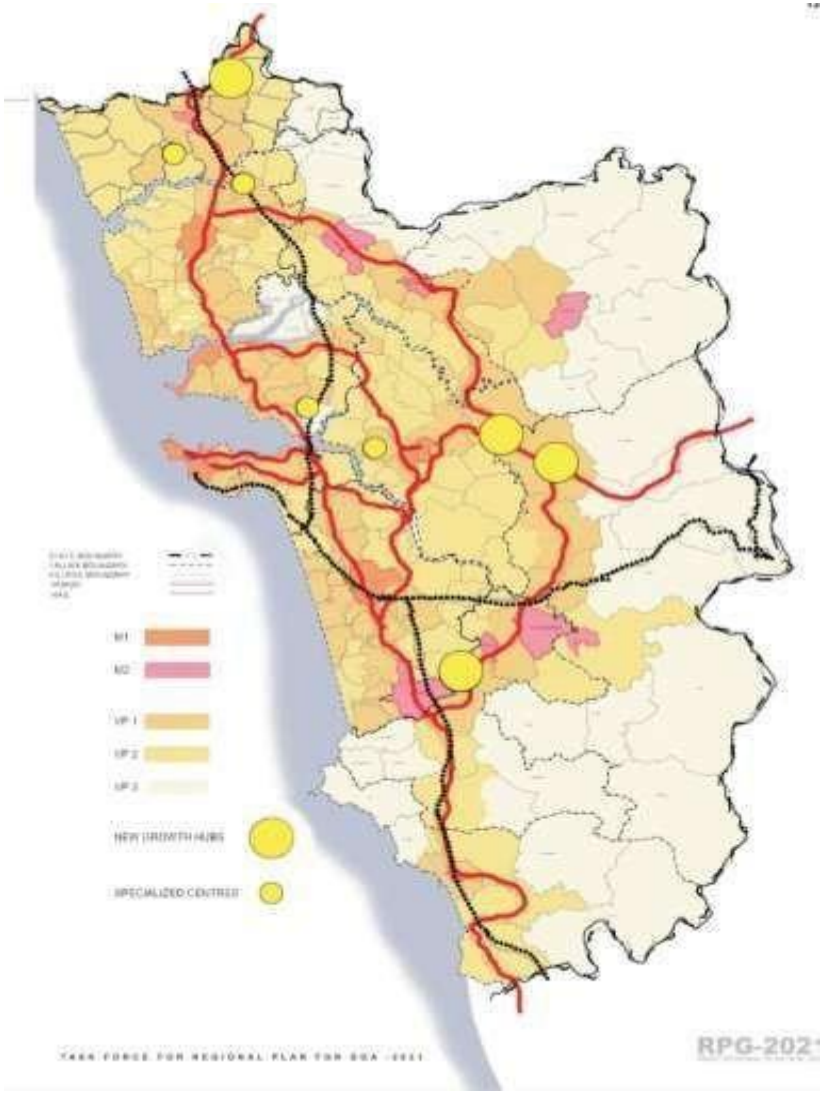

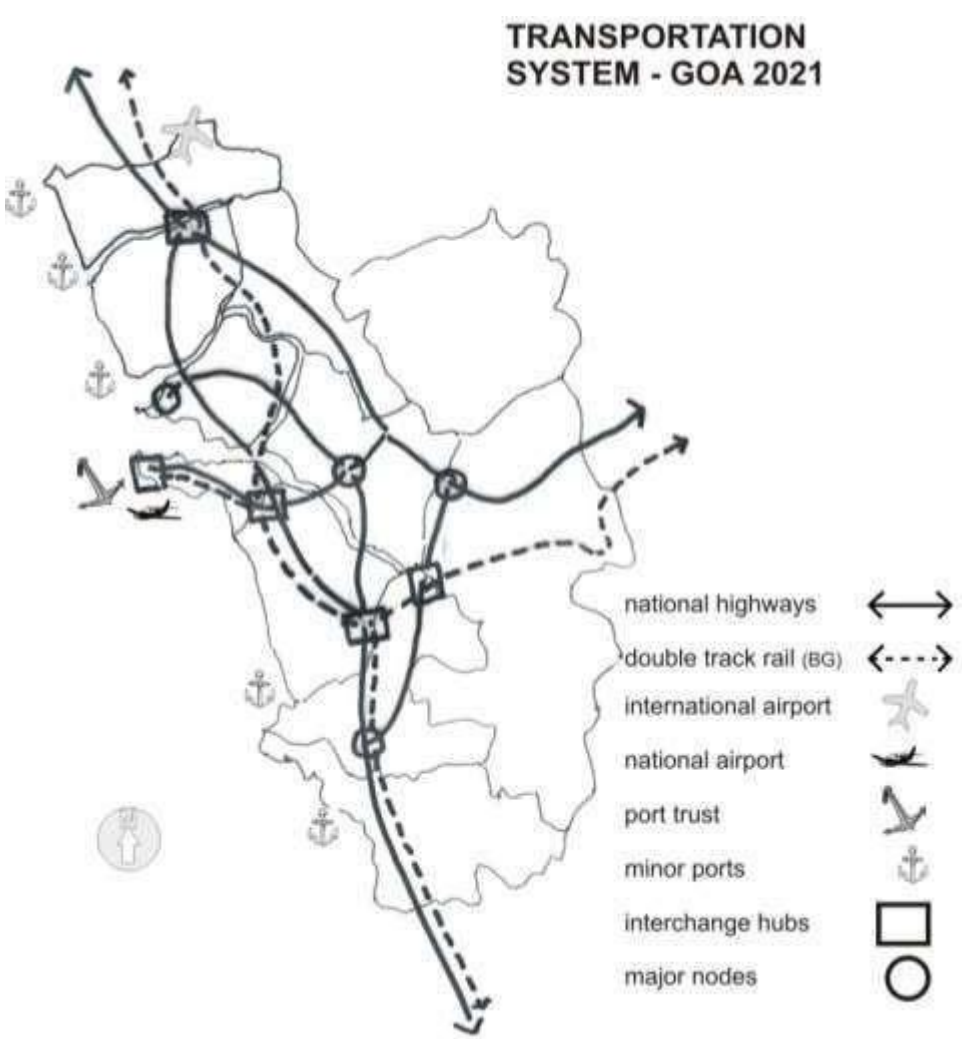

SPATIAL STRATEGY

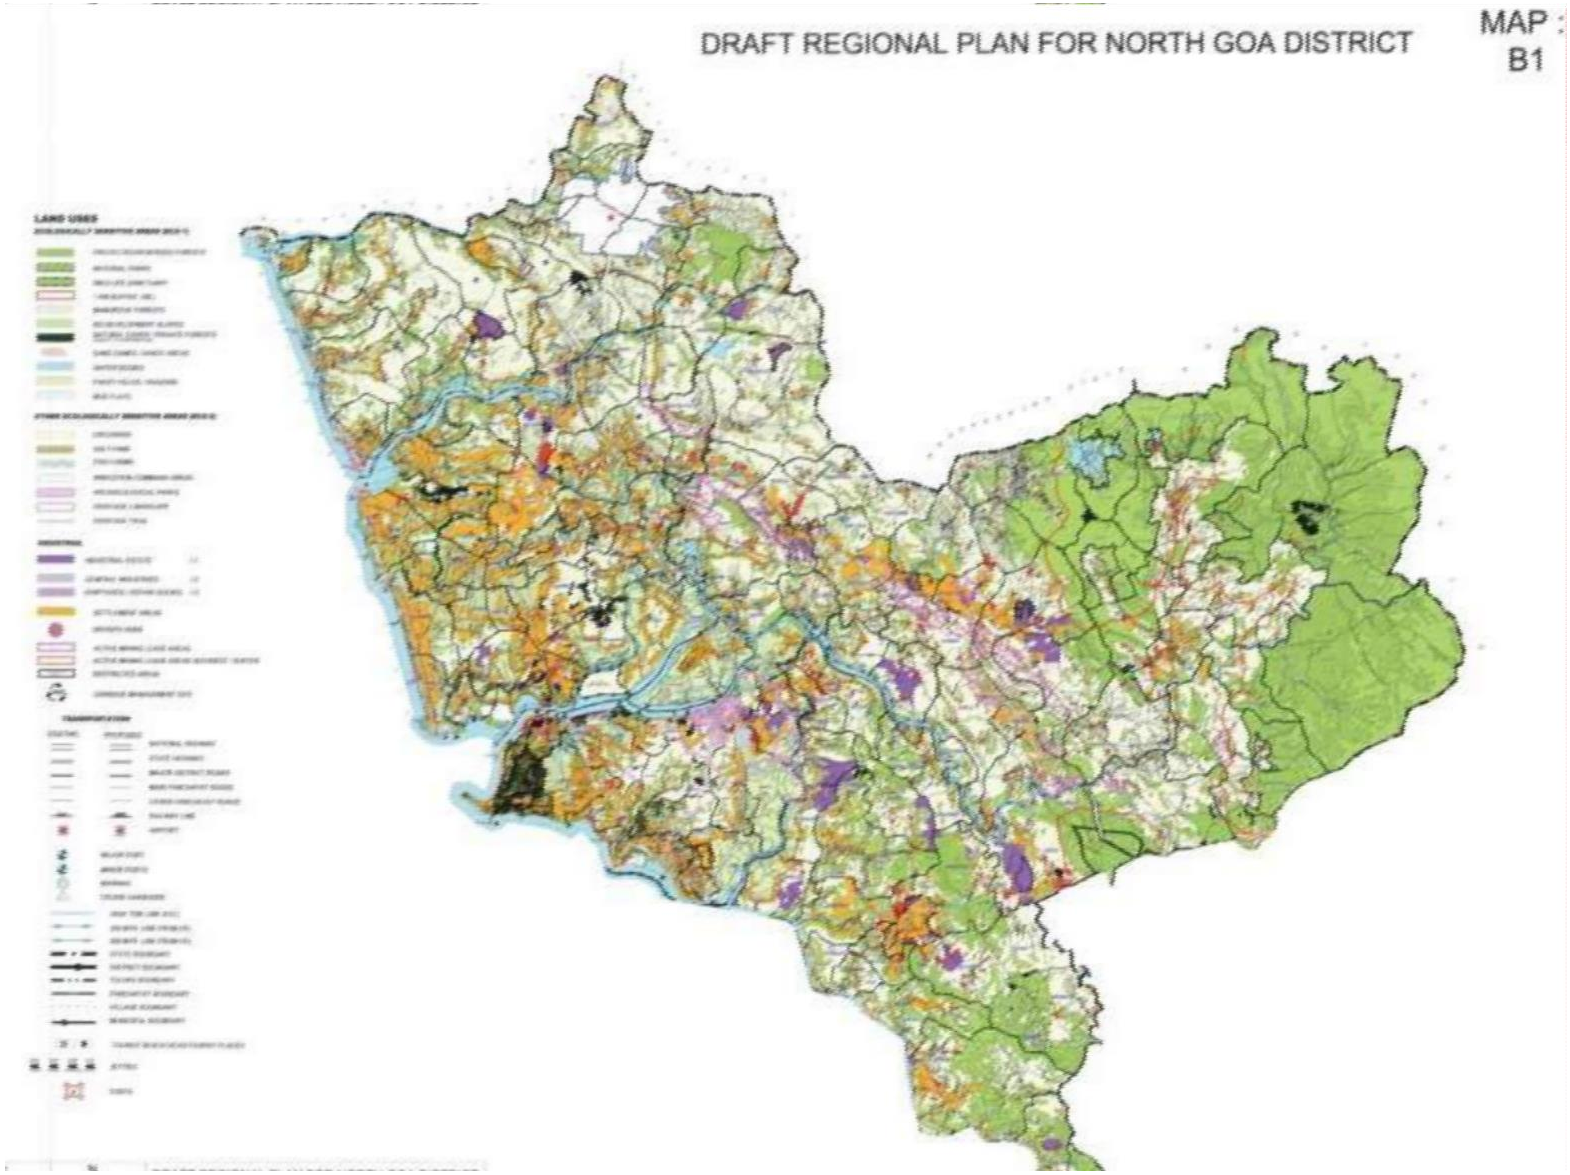

SPATIAL STRATEGY

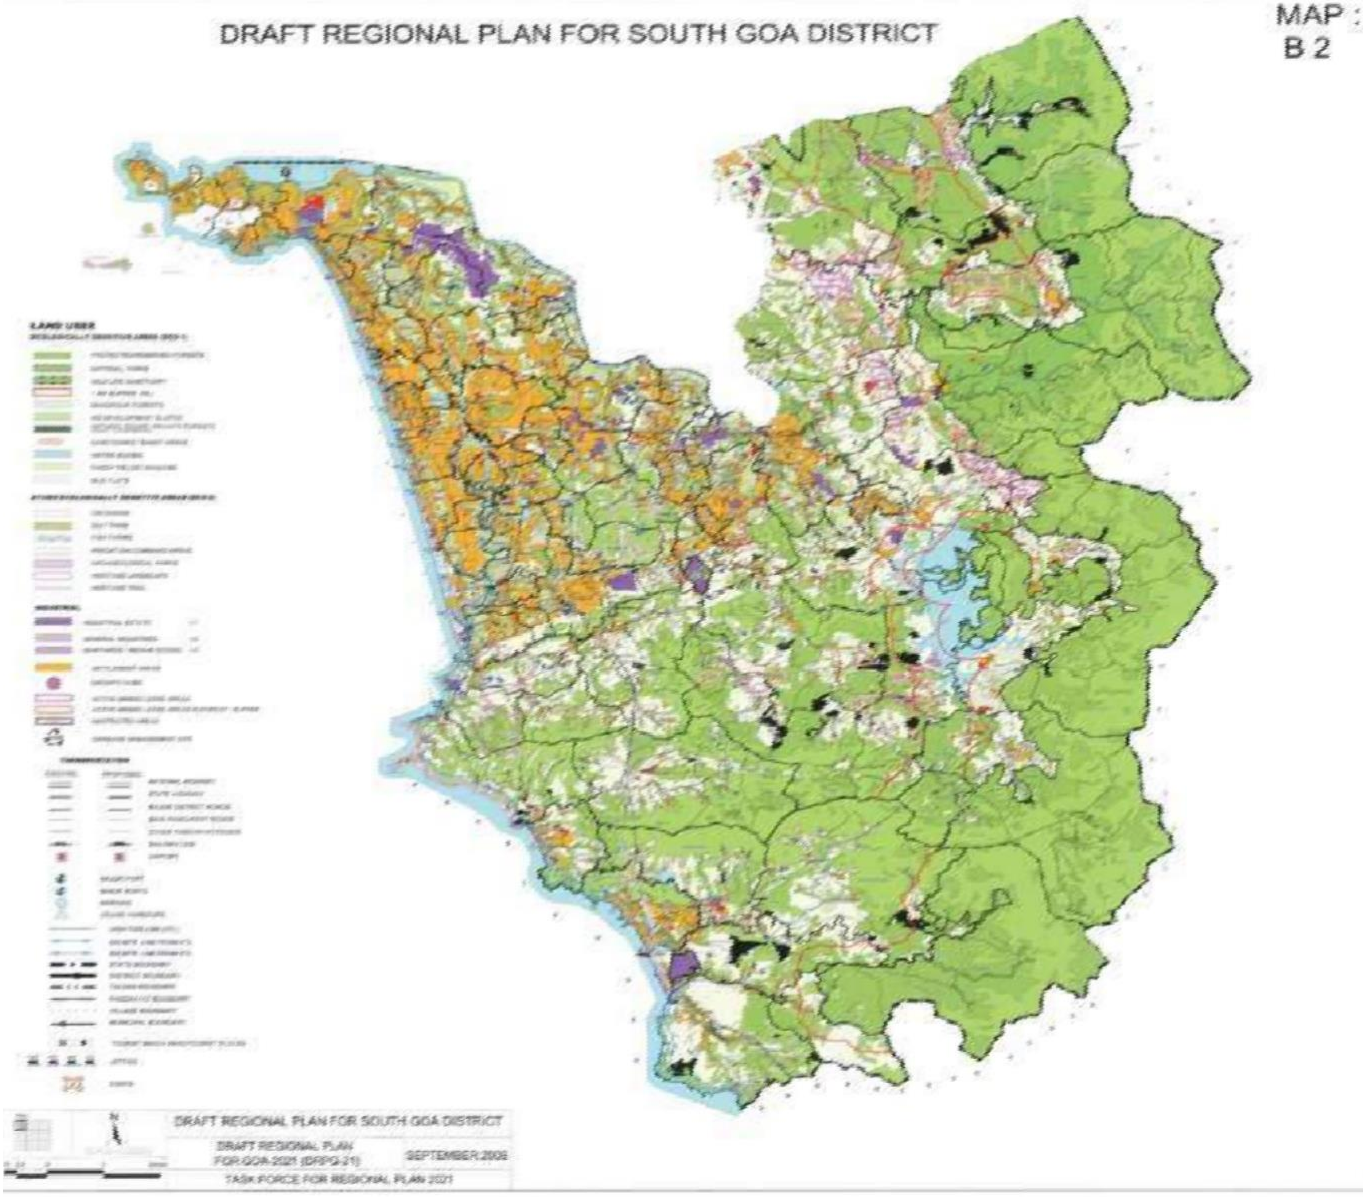

RPG-21 : DISTRICT PLANS

RPG-21 : DISTRICT PLANS

WHY IS RPG 2021 SIGNIFICANT?

- Foregrounds Participation & Sustainability
  - *RPG-2021 as broad framework with development plans to be prepared by Local Bodies*
  - *80% land under eco-protection and regulated development*

FOREST VIOLATION
